

US Patent US9242116 B2

Fact: Sudden Cardiac Arrest kill more than 300,000 in the US each year.
Problem: More than 25% could be saved if AEDs were available.
Solution: Altrix Medical's AED Technology can save lives.

Altrix Medical is creating a pocket-size Automated External Defibrillator (AED) that integrates with a smartphone

This innovative medical device:

- Allows for on-site diagnosis and treatment of Sudden Cardiac Arrest (SCA)
- Goes anywhere a person's phone goes
- Offers equivalent life-saving shocks as AEDs on the market today
- Provides emergency telecommunications and full motion video when connected to your smartphone

ALL COMPONENTS FIT WITHIN THE CASE

Powered By: Compact Rechargeable Batteries
 Charges in <10 seconds

Video-Capable Emergency 911 Communication
 Capable of providing instructions in multiple languages

GPS Transmission To Emergency Responders
 Ensuring first responders are on the way as soon as possible

Back-Up Power For Emergencies

Integrates With Your Existing Smartphone
 Only Slightly Larger Than A Typical Smartphone Case

An AED When And Where You Need It!
